CONTENTS OF VOLUME 53

January/February **Number 1/2**

M. J. RYCROFT: Scope and policy 1

Review paper
B. HULTQVIST: Extraction of ionospheric plasma by magnetospheric processes 3

W. R. SHELDON: On the precipitation of relativistic electrons from the outer belt 17

G. O. WALKER, T. Y. Y. LI, Y. W. WONG, T. KIKUCHI and Y. N. HUANG: Ionospheric and geomagnetic effects of the solar eclipse of 18 March 1988 in East Asia 25

A. PHILLIPS and B. H. BRIGGS: The day-to-day variability of upper atmosphere tidal winds and dynamo currents..... 39

L. THOMAS and I. ASTIN: Compression and rarefaction of *F*-region plasma caused by an atmospheric gravity wave 49

A. R. JACOBSON and R. C. CARLOS: A study of apparent ionospheric motions associated with multiple Traveling Ionospheric Disturbances 53

A. R. JACOBSON, R. C. CARLOS and G. NALESSO: Smoothness of the HF virtual reflector in the quiet, daytime mid-latitude *F*-region 63

P. L. DYSON: A simple method of backscatter ionogram analysis 75

K. L. JONES and D. L. THIELE: Further observations of the structure of the *D*-region using a 1.98 MHz steerable-beam radar 89

I. ASTIN and L. THOMAS: The rapid fading of radio waves reflected from sporadic-*E* ionization 99

R. I. BARNES: Modelling the horizontal structure of mid-latitude E_s from its refraction effects on *F*-region echoes 105

C. J. BURNS, E. TURUNEN, H. MATVEINEN, H. RANTA and J. K. HARGREAVES: Chemical modelling of the quiet summer *D*- and *E*-regions using EISCAT electron density profiles 115

C. TAIEB: Simulation of the polar cap thermal plasma and comparison with EISCAT measurements 135

H. J. STRANGEWAYS: The upper cut-off frequency of nose whistlers and implications for duct structure 151

Discussion paper
E. M. DEWAN and R. SHAPIRO: Are sunspot–weather correlations real?..... 171

International Geophysical Calendar 1991 I

March/April Number 3/4

IONOSPHERIC SIGNATURES OF MAGNETOSPHERIC PHENOMENA

S. W. H. Cowley and H. J. Opgenoorth: Introduction 175

Review paper
M. Lockwood: The excitation of ionospheric convection..... 177

M. Pinnock, A. S. Rodger, J. R. Dudeney, R. A. Greenwald, K. B. Baker and J. M. Ruohoniemi: An ionospheric signature of possible enhanced magnetic field merging on the dayside magnetopause 201

A. Nishida: Ionospheric signatures of random reconnection on the dayside magnetopause 213

A. T. Y. Lui and D. G. Sibeck: Dayside auroral activities and their implications for impulsive entry processes in the dayside magnetosphere 219

R. E. Erlandson, D. G. Sibeck, R. E. Lopez, L. J. Zanetti and T. A. Potemra: Observations of solar wind pressure initiated fast mode waves at geostationary orbit and in the polar cap 231

P. N. Collis and I. Häggström: High-latitude ionospheric response to a geomagnetic sudden commencement 241

J. R. Dudeney, A. S. Rodger, M. Pinnock, J. M. Ruohoniemi, K. B. Baker and R. A. Greenwald: Studies of conjugate plasma convection in the vicinity of the Harang discontinuity..... 249

A. L. Kotikov, B. D. Bolotynskaya, V. A. Gizler, O. A. Troshichev, A. B. Pashin and V. R. Tagirov: Structure of auroral zone phenomena from the data of meridional chains of stations: magnetic disturbances in the nighttime auroral zone and auroras 265

A. S. Besprozvannaya, B. D. Bolotinskaya, A. L. Kotikov, E. I. Nemtsova, O. M. Pirog, O. A. Troshichev, A. V. Frank-Kamenetsky and T. I. Shchuka: Structure of auroral zone phenomena from the data of meridional chains of stations: the lower ionosphere during the expansion phase of magnetospheric substorms 275

D. Lummerzheim, M. H. Rees, J. D. Craven and L. A. Frank: Ionospheric conductances derived from DE-1 auroral images 281

F. J. Rich, M. S. Gussenhoven, D. A. Hardy and E. Holeman: Average height-integrated Joule heating rates and magnetic deflection vectors due to field-aligned currents during sunspot minimum 293

E. Mravlag, M. W. J. Scourfield, A. D. M. Walker, P. R. Sutcliffe and E. Nielsen: Simultaneous observations of omega band related phenomena in both hemispheres 309

F. Märcz: Analysis of ionospheric absorption associated with interplanetary magnetic clouds 319

G. Sátori: Combined ionospheric effect due to Forbush decreases and magnetospheric high energy particles at mid-latitudes 325

A. Berthelier, J.-C. Cerisier, J.-J. Berthelier and L. Rezeau: Low-frequency magnetic turbulence in the high-latitude topside ionosphere: low-frequency waves or field-aligned currents? 333

P. M. Aslin, M. J. Jarvis and K. Morrison: Ionosonde signatures of *Pc*1 pulsations 343

Review paper
Y. OMURA, D. NUNN, H. MATSUMOTO and M. J. RYCROFT: A review of observational, theoretical and numerical studies of VLF triggered emissions 351

A. D. SARMA and R. S. COLE: Effect of multipath and snow on millimeter wave scintillations on a 4.1-km line-of-sight link 369

A. BHATTACHARYYA: Phase and amplitude scintillations due to electrojet irregularities ... 379

S. KIRKWOOD and U. VON ZAHN: On the role of auroral electric fields in the formation of low altitude sporadic-*E* and sudden sodium layers 389

D. I. STEEL and W. G. ELFORD: The height distribution of radio meteors: comparison of observations at different frequencies on the basis of standard echo theory 409

V. L. R. KUNTZ, L. R. PIAZZA and P. KAUFMANN: *C*-layer dependence on solar cycle and southern latitude observed by VLF propagation 419

E. L. FLEMING and SUSHIL CHANDRA: A tidal wind model for 85–120 km based on CIRA-86: a feasibility study 425

G. G. BOWMAN and L. A. HAJKOWICZ: Small-scale ionospheric structures associated with mid-latitude spread-*F* 447

Book reviews 459

Corrigenda 463

THERMOSPHERIC AND IONOSPHERIC DYNAMICS

R. W. SMITH: Introduction 465

A. L. ARULIAH, D. REES and T. J. FULLER-ROWELL: The combined effect of solar and geomagnetic activity on high latitude thermospheric neutral winds. Part I. Observations 467

R. I. CRICKMORE, J. R. DUDENEY and A. S. RODGER: Vertical thermospheric winds at the equatorward edge of the auroral oval 485

D. REES, S. BATTEN, A. L. ARULIAH, T. J. FULLER-ROWELL, A. D. FARMER and K. S. C. FREEMAN: Long-lived polar thermospheric vortices: a combined radar and optical study 493

R. SRIDHARAN, S. GURUBARAN, R. RAGHAVARAO and R. SUHASINI: Co-ordinated thermospheric and *F*-region measurements from low latitudes 515

R. SRIDHARAN, R. RAGHAVARAO, S. GURUBARAN and R. NARAYANAN: First results of *OI* 630.0 nm dayglow measurements from equatorial latitudes 521

T. J. FULLER-ROWELL, D. REES, S. QUEGAN and R. J. MOFFETT: Numerical simulations of the sub-auroral *F*-region trough 529

T. J. Fuller-Rowell, D. Rees, H. Rishbeth, A. G. Burns, T. L. Killeen and R. G. Roble: Modelling of composition changes during *F*-region storms: a reassessment 541

Y. Rippeth, R. J. Moffett and G. J. Bailey: Model plasmasphere calculations for *L*-values near 2.5 at the longitude of Argentine Islands, Antarctica 551

R. Sellek, G. J. Bailey, R. J. Moffett, R. A. Heelis and P. C. Anderson: Effects of large zonal plasma drifts on the subauroral ionosphere 557

J. Hanumath Sastri, K. B. Ramesh and J. V. S. V. Rao: Doppler frequency fluctuations of lower thermospheric reflections in the equatorial electrojet region 567

H. M. Beggs: Correlation between variations in the amplitude and change in phase path of a radio signal reflected from a travelling ionospheric disturbance 577

L. S. Al'perovich, E. N. Fedorov, A. V. Volgin, V. A. Pilipenko and S. N. Pokhil'ko: Doppler sounding as a tool for the study of the MHD wave structure in the magnetosphere 581

I. W. McCrea, M. Lester, T. R. Robinson, N. M. Wade and T. B. Jones: On the identification and occurrence of ion frictional heating events in the high-latitude ionosphere 587

S. Fukao, W. L. Oliver, Y. Onishi, T. Takami, T. Sato, T. Tsuda, M. Yamamoto and S. Kato: *F*-region seasonal behavior as measured by the MU radar 599

Yinn-Nien Huang and Kang Cheng: Medium-scale traveling ionospheric disturbances around the equatorial anomaly crest as detected by the differential Doppler shift method 619

G. O. Walker, W. Y. Wong, Y. N. Huang, T. Kikuchi, J. Soegijo, V. Badillo and E. P. Szuszczewicz: Periodic behaviour of the ionosphere in South East Asia on storm and quiet days during the May/June SUNDIAL campaign, 1987 627

E. V. Mishin, A. E. Epishova, L. M. Ishkova, E. M. Kovalevskaya, E. F. Kozlov, L. E. Kolokolov, L. N. Rubtsov, N. I. Samorokin, L. N. Sidorova, V. M. Somsikov, V. A. Telegin and L. A. Yudovich: Disturbances of *F*-region electron density following solar terminator during the WITS period of 16–20 March 1988 643

T. V. Gaivoronska and T. I. Zelenova: The effect of seismic activity on *F*2-layer critical frequencies 649

V. A. Nechitailenko: Modern problems of meteor wind interpretation 653

August **Number 8**

EQUATORIAL AERONOMY

B. G. Fejer, D. N. Anderson, S. Fukao and M. A. Abdu: Preface 663

D. T. Farley: Early incoherent scatter observations at Jicamarca 665

B. G. Fejer: Low latitude electrodynamic plasma drifts: a review 677

M. C. Kelley and D. L. Hysell: Equatorial spread-*F* and neutral atmospheric turbulence: a review and a comparative anatomy..... 695

R. F. Pfaff Jr: Rocket observations in the equatorial electrojet: current status and critical problems 709

J. H. A. Sobral and M. A. Abdu: Solar activity effects on equatorial plasma bubble zonal velocity and its latitude gradient as measured by airglow scanning photometers ... 729

S. Basu, Su. Basu, E. Kudeki, H. P. Zengingonul, M. A. Biondi and J. W. Meriwether: Zonal irregularity drifts and neutral winds measured near the magnetic equator in Peru 743

M. A. Abdu, J. H. A. Sobral, E. R. de Paula and I. S. Batista: Magnetospheric disturbance effects on the Equatorial Ionization Anomaly (EIA): an overview 757

T. Takami, S. Fukao, W. L. Oliver, S. Kato, T. Tsuda, T. Sato, M. D. Yamanaka, M. Yamamoto and T. Nakamura: Multiple beam observations of mid-latitude ionospheric disturbances by the MU radar 773

G. Schmidtke, H. Doll, C. Wita and S. Chakrabarti: Solar EUV/UV and equatorial airglow measurements from San Marco-5 781

P. Muralikrishna and M. A. Abdu: *In-situ* measurement of ionospheric plasma density by two different techniques—a comparison 787

September **Number 9**

ELECTRODYNAMIC INTERACTIONS BETWEEN THE MAGNETOSPHERE, IONOSPHERE AND ATMOSPHERE

R. A. Goldberg: Introduction 795

T. L. Killeen, F. G. McCormac, A. G. Burns, J. P. Thayer, R. M. Johnson and R. J. Niciejewski: On the dynamics and composition of the high-latitude thermosphere 797

R. A. Wolf, R. W. Spiro and F. J. Rich: Extension of convection modeling into the high-latitude ionosphere: some theoretical difficulties 817

R. G. Roble: On modeling component processes in the Earth's global electric circuit 831

M. J. Rycroft: Interactions between whistler-mode waves and energetic electrons in the coupled system formed by the magnetosphere, ionosphere and atmosphere..... 849

G. J. Byrne, J. R. Benbrook and E. A. Bering: Balloon observations of stratospheric electricity above the South Pole: vertical electric field, conductivity, and conduction current 859

M. N. M. Rao, B. C. N. Rao and V. C. Jain: Energy deposition by precipitating keV range protons and neutral hydrogen atoms into the equatorial atmosphere: dependence on the neutral atmosphere model 869

D. K. Chakrabarty, G. Beig, J. S. Sidhu and S. R. Das: Parachute measurements of positive ion density of the middle atmosphere over the dip equator by spherical probe .. 875

October **Number 10**

A. K. Murali, S. R. Prabhakaran Nayar and V. V. Somayajulu: Role of periodic fluctuations in solar wind–magnetosphere coupling 881

E. L. Afraimovich and V. F. Smirnov: Angular characteristics of radio pulses reflected from the subpolar ionosphere..... 889

Chao-Song Huang and Jun Li: Weak nonlinear theory of the ionospheric response to atmospheric gravity waves in the *F*-region 903

G. D. Price and F. Jacka: The influence of geomagnetic activity on the upper mesosphere/lower thermosphere in the auroral zone. I. Vertical winds 909

G. D. Price, F. Jacka, R. A. Vincent and G. B. Burns: The influence of geomagnetic activity on the upper mesosphere/lower thermosphere in the auroral zone. II. Horizontal winds 923

R. P. Singhal: The effect of the electric field and neutral winds on *E*-region ion densities and conductivities at low latitudes 949

R. J. Stening and P. A. Hopgood: Geomagnetic quiet daily variations in the Australian region—information from a new station at Charters Towers (20.1°S) 959

V. V. Somayajulu, B. V. Krishna Murthy and K. S. V. Subbarao: Response of night-time equatorial *F*-region to magnetic disturbances 965

S. Prakash, S. Pal and H. Chandra: *In-situ* studies of equatorial spread-*F* over SHAR—steep gradients in the bottomside *F*-region and transitional wavelength results 977

Book reviews 987

November/December **Number 11/12**

SOLAR-TERRESTRIAL PHYSICS

M. J. Rycroft: Preface 991

R. P. Cebula, M. T. DeLand, E. Hilsenrath, B. M. Schlesinger, R. D. Hudson and D. F. Heath: Intercomparisons of the solar irradiance measurements from the Nimbus-7 SBUV, the NOAA-9 and NOAA-11 SBUV/2, and the STS-34 SSBUV instruments: a preliminary study 993

J. M. Pap, R. F. Donnelly, H. S. Hudson, G. J. Rottman and R. C. Willson: Variability of solar ultraviolet irradiance 999

W. Kent Tobiska: Revised solar extreme ultraviolet flux model 1005

I. Charvátová and J. Střeštík: Solar variability as a manifestation of the Sun's motion 1019

A. M. Heras, B. Sanahuja, Z. K. Smith, T. Detman and M. Dryer: Solar and interplanetary shock effects on the flux and anisotropy profiles of an Energetic Storm Particle (ESP) event observed on 23–25 April 1979 1027

A. M. Heras, B. Sanahuja, Z. K. Smith, T. Detman and M. Dryer: On the large-scale effects of two interplanetary shocks on the associated particle events 1033

C. J. Farrugia, M. W. Dunlop, S. Elliott, M. P. Freeman, A. Balogh, S. W. H. Cowley, R. P. Lepping and D. G. Sibeck: Multipoint observations of planar interplanetary magnetic field structures 1039

Z. Němeček and J. Šafránková: The Earth's bow shock and magnetopause position as a result of the solar wind magnetosphere interaction 1049

Gong-Liang Zhang: Geomagnetic storms categorized by varieties of interplanetary structures..... 1055

H. O. Rucker and K. J. Trattner: Solar wind terrestrial magnetosphere coupling: application of linear prediction theory 1069

A. E. Antonova and A. P. Kropotkin: Magnetic flux rope type structures in the geomagnetic tail 1073

B. P. Besser, H. K. Biernat and R. P. Rijnbeek: Dissipative stagnation-point flows at a current sheet with shear in the plasma velocity 1081

R.-L. Xu: The displaced equatorial–neutral sheet surface observed by the ISEE-2 satellite 1085

I. A. Daglis, E. T. Sarris and G. Kremser: Ionospheric contribution to the cross-tail current enhancement during the substorm growth phase 1091

I. I. Alexeev and E. S. Belenkaya: Alfvén wings in the vicinity of a conducting body in a magnetized plasma 1099

W. Lennartsson: Solar control of the Earth's emission of energetic O^+ 1103

A. A. Namgaladze, Yu. N. Korenkov, V. V. Klimenko, I. V. Karpov, V. A. Surotkin and N. M. Naumova: Numerical modelling of the thermosphere–ionosphere–protonosphere system..... 1113

N. Jakowski, B. Fichtelmann and A. Jungstand: Solar activity control of ionospheric and thermospheric processes 1125

N. Jakowski, A. Jungstand, L. Lois and B. Lazo: Night-time enhancements of the *F*2-layer ionization over Havana, Cuba 1131

K. Serafimov and M. Serafimova: Effects of vibrationally excited molecular nitrogen on ionospheric–thermospheric coupling for different levels of solar activity 1139

D. Pancheva, R. Schminder and J. Laštovička: 27-day fluctuations in the ionospheric *D*-region 1145

D. Pancheva, J. Laštovička and B. A. de la Morena: Quasi-periodic fluctuations in ionospheric absorption in relation to planetary activity in the stratosphere 1151

S. Yu. Ermilov and A. V. Mikhalev: Optical manifestation of microbursts of electron fluxes 1157

V. Bucha: Solar and geomagnetic variability and changes of weather and climate 1161

M. N. Sasi and B. V. Krishna Murthy: A study of quasi-biennial oscillation in the tropical stratosphere..... 1173

O. P. NAGPAL and R. RAGHAVARAO: On the wave forcing of the semi-annual zonal wind oscillation 1181

YU. P. KOSHELKOV: Mean temperature fields in the upper stratosphere..... 1195

D. A. TARASENKO: Longitudinal variations of wind in the middle atmosphere 1203

D. BILITZA: Solar-terrestrial models at the National Space Science Data Center..... 1207
